# NOISE PROTECTION

Regulations, guidelines and protection means

MASZYNY-SERWIS

As a long-time manufacturer of eccentric press parts and their peripherals, we have specialised in the production of the tailor made sound absorbing cabins.

# NOISE PROTECTION METHODS

## casings

- Completely and tightly cover the machine.
- The most effective noise protection.

## screens

- Suitable for use at the operator's seat.
- They limit noise at only one station.

## silencers

- Absorption silencers - for broadband noise
- Reflective silencers - for low-frequency noise

# SOUND ABSORBING CABINS

- It is made of rigid sheets, which form the external housing of the machine, the internal side is covered with sound absorbing material of appropriate parameters.
- The design and construction are carried out for specific machines.
- Appropriately designed cabins allow easy operation of the machine and ensure adequate noise reduction.
